

Creating a safer future

We are committed to our purpose of ‘creating a safer future’ – a safer future for people and property protected from fire, and a safer future for our planet too.

We continue to find ways of reducing our environmental impact – both as a business and as individuals.

Wherever possible, we choose climate-friendly methods of manufacture and actively seek out more sustainable ways of operating.

Here are just some of our green initiatives:

Our teams

- Electric vehicle charging points
- Cycle to work scheme
- Electric vehicle scheme

Our products and marketing

- Recycled paper packaging
- Waste metal recycling
- Carbon neutral print supply

Our headquarters

- Green energy supply
- Water management system
- Heat exchange system
- Low-energy lighting and auto cut-off
- Climate control system

Our suppliers

Sustainability evaluations and audits to assess:

- Sustainability policy
- Environmental measures
- Waste management
- Packaging
- Carbon footprint

We are an ISO 14001 accredited company, dedicated to reducing our impact on the environment.

A **Halma** company

We are part of Halma plc, a FTSE 100 company with a shared purpose to ‘grow a safer, cleaner, healthier future for everyone, every day’.
