

You can now stop unwanted evacuations

AdvancedLive 4.0 is here

You no longer need to be beside the fire panel to acknowledge alarms.

AdvancedLive now features an alarm acknowledgement button, mirroring the one on your fire panel, so you can act remotely.

Pressing the acknowledgement button on your mobile, tablet or laptop lets you extend the investigation period on site.

Our easy-to-use maps will help you find the device in alarm before the extra time elapses and avoid unwanted alarms.

You can now also use AdvancedLive to isolate a device in alarm before going to the panel to reset your system.

Latest features

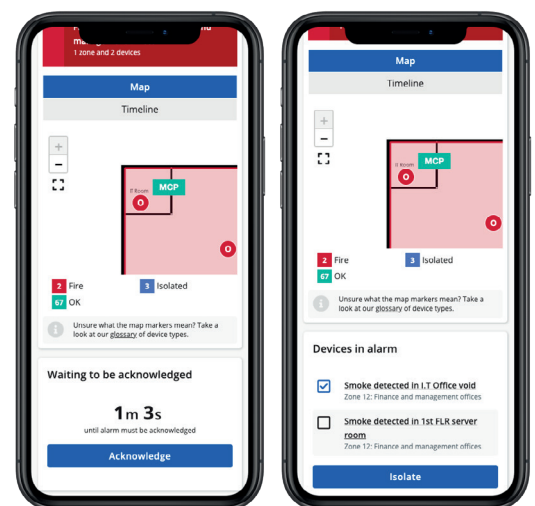

Remotely acknowledge and extend the fire alarm investigation period (if your fire system is set up with this option)

Isolate devices in alarm to help you deal with unwanted alarms before resetting the fire system at the panel

Seamlessly and securely access AdvancedLive via a text notification link during an alarm.

To experience the changes, log in to your AdvancedLive account, or to find out more, visit live.advancedco.com, contact your sales representative or email enquiries@advancedco.com
