

Waste Electrical and Electronic Equipment (WEEE) Compliance Policy

Advanced would like to advise you of our ongoing efforts to ensure the compliance of our products under the Waste Electrical and Electronic Equipment (WEEE) Regulations 2013.

The UK regulations on WEEE identify the measures which need to be taken for the prevention of electronic and electrical waste and producer obligations for the financing of the costs of the treatment and environmentally sound disposal of WEEE.

Advanced complies with the UK regulations on WEEE and RoHS.

As a producer of WEEE, our products carry our name and address and the crossed-out wheelie bin logo detailed below. Our Producer Registration Number is WEE/FE0604UU.

The presence of this logo indicates that the product should not be placed in general municipal waste but should be either sent to an approved recycling centre or disposal operator for safe recycling, recovery or reuse.

Advanced offers customers the opportunity to return products at the end of their functional lives for recycling, if the item has the Advanced logo and is marked with the WEEE symbol shown above.

The normal product return policy will apply with pre-authorisation required under our RMA process. We reserve the right to return the product to you if no RMA is present.

We are committed to creating a safer, cleaner, healthier future for everyone, every day by ensuring we are compliant with all environmental legislation.

If you have any questions regarding this letter, please do not hesitate to contact us.

A copy of this WEEE policy is available on our website at <https://uk.advancedco.com>.
