Safe in Our Hands

Sprinkler systems are now mandatory in new UK care homes*

The MxPro 5 from Advanced offers a dependable compliance solution that's robust, versatile and quick to install.

Any new or existing MxPro 5 panel can be easily adapted to provide sprinkler indication and monitoring functionality.

And as ever with the MxPro 5, open protocol flexibility ensures compatibility with the leading wired and wireless device protocols.

Ideal for monitoring hundreds of sprinkler flow switches, the EN54-approved MxPro 5 also offers:

- Up to 50 sprinkler zone indicators for fire and fault, with slide-in labels for easy identification
- Building management interface option
- A choice of semi-flush or surface-mount and special colours/finishes
- Keypad or key switch entry
- Remote, real-time fire system management with AdvancedLive.

Creating a safer future

*2025 update of Approved Document B (Fire Safety)

Does my care home need a sprinkler system?

Is your care home in a new build?

YES →

A sprinker system is now mandatory.

Part codes required	
MX-5401D	4-loop enclosure panel (deep enclosure)
MXM-524-D2	Spare door with zone aperture
MXP-513-050CRY	50 zone LED slide-in labels to customise sprinkler zones with text for fire (red) and fault (yellow)
MXP-537	10-way input cards (up to 3 cards for a maximum of 30 zones)
MXM-517	Battery (18Ah)/utility enclosure (large)

NO →

Do you want to comply with the new regulations and retrofit a sprinkler panel for the additional safety of the residents?

YES → Do you have an existing Advanced panel?

NO → No action required

YES → Is it a **MX-5401D** (4-loop panel with a deep enclosure)?

YES → Fit a new door and LED indication.

Part codes required	
MXM-524-D2	Spare door with zone aperture
MXP-513-050CRY	50 zone LED slide-in labels to customise sprinkler zones with text for fire (red) and fault (yellow)
MXP-537	10-way input cards (up to 3 cards for a maximum of 30 zones)

NO → Order a new 4-loop large enclosure panel.

Part codes requires	
MX-5401D	4-loop enclosure panel (deep enclosure)
MXM-524-D2	Spare door with zone aperture
MXP-513-050CRY	50 zone LED slide-in labels to customise sprinkler zones with text for fire (red) and fault (yellow)
MXM-505	Termination enclosure (large)
MXP-537	10-way input cards (up to 3 cards for a maximum of 30 zones)
MXM-517	Battery (18Ah)/utility enclosure (large)

If you have a **MX-5401D**, you can convert your existing panel by fitting a spare door with zone aperture **(MXM-542-D2)**.
